

Everybody Urgent®

The new standard in emergency and disaster circumstances

Everybody Company

Based in Europe, Everybody Company creates commercially viable solutions for the challenges that our world faces.

We are committed to creating competitive and attractive products that meet the needs of humanity, while promoting respect for people and planet.

When a natural disaster, terrorism act or armed conflict occurs, adequate resources may not be available to handle the processing of mass fatalities. The Everybody Urgent® coffin provides a solution to meet civil preparedness demands for federal & local governments, relief organizations and professional Disaster & Emergency Management companies. Specifically developed for deployment in difficult circumstances, the Everybody Urgent® comes flat-packed for convenient transportation and storage in large volumes. Its specially developed click-to-construct design makes it easy to assemble instantly by hand and by anyone on site.

Everybody Coffins[®]

The new standard in easy-to-assemble coffins

Easy to assemble

Its unique pre-cut click-to-construct design makes it easy to assemble on any location: no tools, glue, nails, screws or staples required. From unwrapping to deployment in just a few minutes. Follow the three easy steps demonstrated below.

Step 1

Remove packaging and check the contents to see if all six parts are present.

Step 2

Arrange the parts as shown, making sure to identify headboard and footboard, left/right side panels, and inside/outside of panels.

Step 3

Click-to-construct: follow the order as shown (A to E).

Note: click and close lid (F) only after remains have been placed in the coffin.
